

TLED Tube In Stock! Ready-to-Ship!

- High Efficiency: Consumes only 10.5 watts to produce 1700 lumens.
• Flexible Design: Allows for single-end or double-end operation on 120-277V.
• Direct Wire Installation: Eliminates the need for electronic ballasts or drivers.
• Excellent Color Rendering: High CRI of 82 for clear, accurate color representation.
• Wide Distribution: 300° beam angle ensures extensive coverage, perfect for task and display lighting.

Great use of 8ft Strips!

New York Power Plant Energy

At its Independence Power Plant in Oswego, New York, roughly 35 miles north of Syracuse on the southeast shore of Lake Ontario, Luminant wanted to take advantage of the latest LED technology when replacing fixtures which covered approximately 83,700 square-foot of the general plant area with multiple floors and different types of spaces including around the facility's water box, condenser, and oil purification skids. (Case Study)

Disclaimer: This case study is being sent to various editorials and the full details will be on our website in the coming months. Distributor - Power-Flo Technologies
